

SCUBA DRY

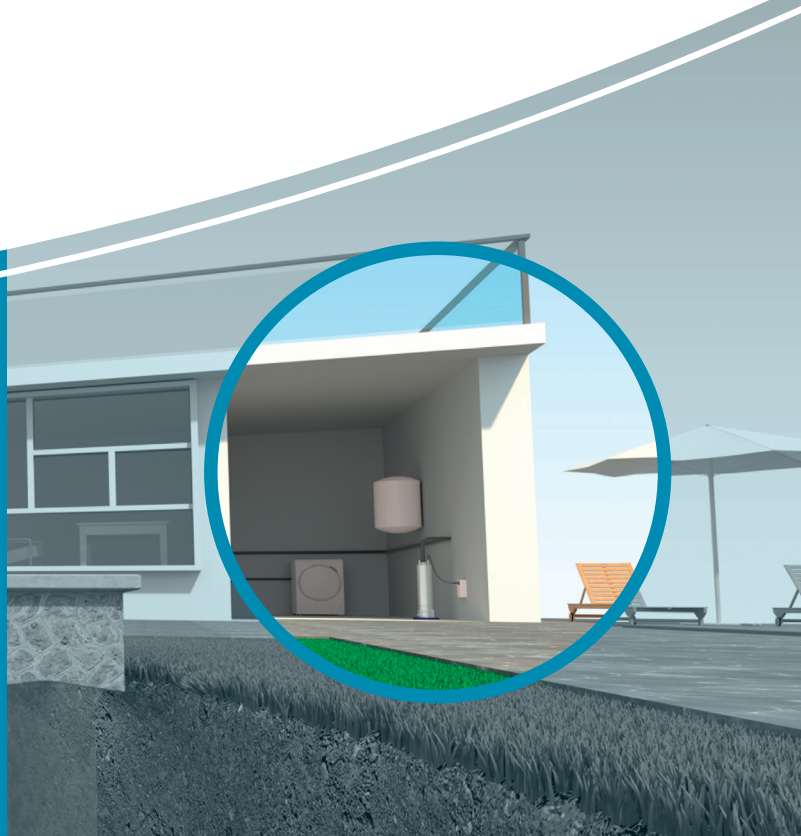

THE WIDEST RANGE OF APPLICATIONS

The SCUBA family is expanding its range from wells to the surface. The water cooled engine makes the new SCUBA DRY not only the right choice for rainwater harvesting installation, but also the perfect solution for boosting pressure outside of a tank or reservoir.

SCUBA DRY

THE WIDEST RANGE
OF APPLICATIONS

From rainwater harvesting, to silent surface applications, SCUBA DRY is the perfect solution for the widest range of applications.

- Range extension to satisfy every customer's needs.

- Ideal for noiseless surface applications.

- Extremely compact for when space is at a premium.

- Stainless steel base version for potable water tank applications.

- Plug-in cables (both power and floater) allow a complete "on-field-upgrade".

- Maximum comfort and protection with Genyo plus and Resiboost combination.

- Designed for rain water harvesting applications.

- Surface Booster set configuration.
