Service kits for EMW slurry pumps

Service kits for EMW slurry pumps

When your EMW heavy-duty slurry pump requires service, you need a solution that minimizes downtime and maximizes efficiency. Don't waste valuable time searching for individual parts or risk delays due to missing components. With EMW service kits, you get everything you need in one convenient package, designed specifically for your pump model.

Optimized for demanding applications

EMW offers tailored service kits that simplify maintenance for heavy-duty slurry pumps, ensuring optimal performance and longevity.

Kits are available for:

- **Bearing unit:** Contains all critical bearings, seals, and related parts for bearing unit overhaul.
- **Shaft seal:** Provides all the essential components for seal replacement, ensuring reliable sealing performance.
- **Wear part:** Includes critical wear parts like liners, impellers, casings and other components subject to abrasion.

Key customer benefits

- All the necessary parts are included in one convenient package, eliminating the need to source individual components.
- Easy-to-use item codes streamline the ordering process.
- Quick and efficient service with all the right parts readily available reduces downtime.
- Original EMW spare parts ensure compatibility, reliability, and optimal pump performance.
- Minimize your on-site inventory by stocking only the necessary service kits.
- Using genuine EMW parts helps extend the life of your pump and reduce overall lifecycle costs.

Simplified ordering and installation

Each EMW service kit is designed for ease of use:

- A unique item code simplifies ordering and inventory management, saving you time and effort.
- Durable, protective packaging safeguards components during shipping and storage and is designed for easy recycling.
- Each kit includes clear and concise instructions to guide you through the service process.

Keep your EMW pumps running at peak performance. Choose EMW service kits for reliable, efficient, and cost-effective maintenance.

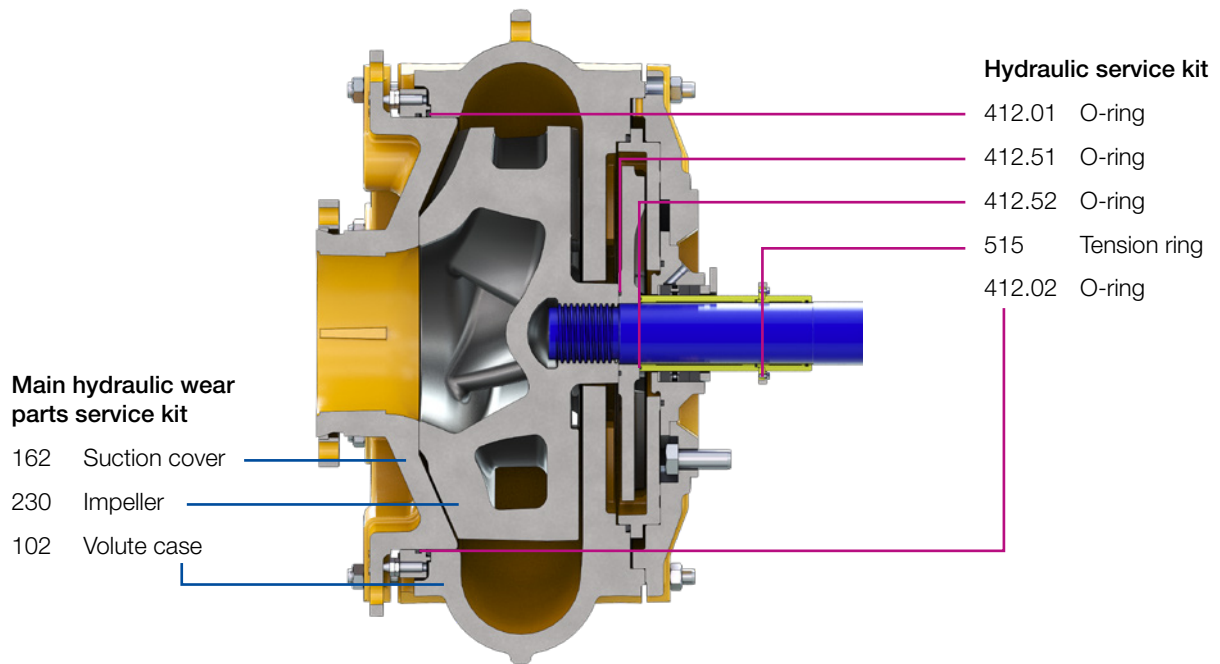

Service kit recommendations

	Hydraulic service kit	Hydraulic wear parts service kit	Suction half wear parts service kit *	Gland packing service kit	Shaft sleeve service kit
Installation & commissioning	●			●	
2 years operation	●	●	●	●	●
Capital spare parts	●			●	●

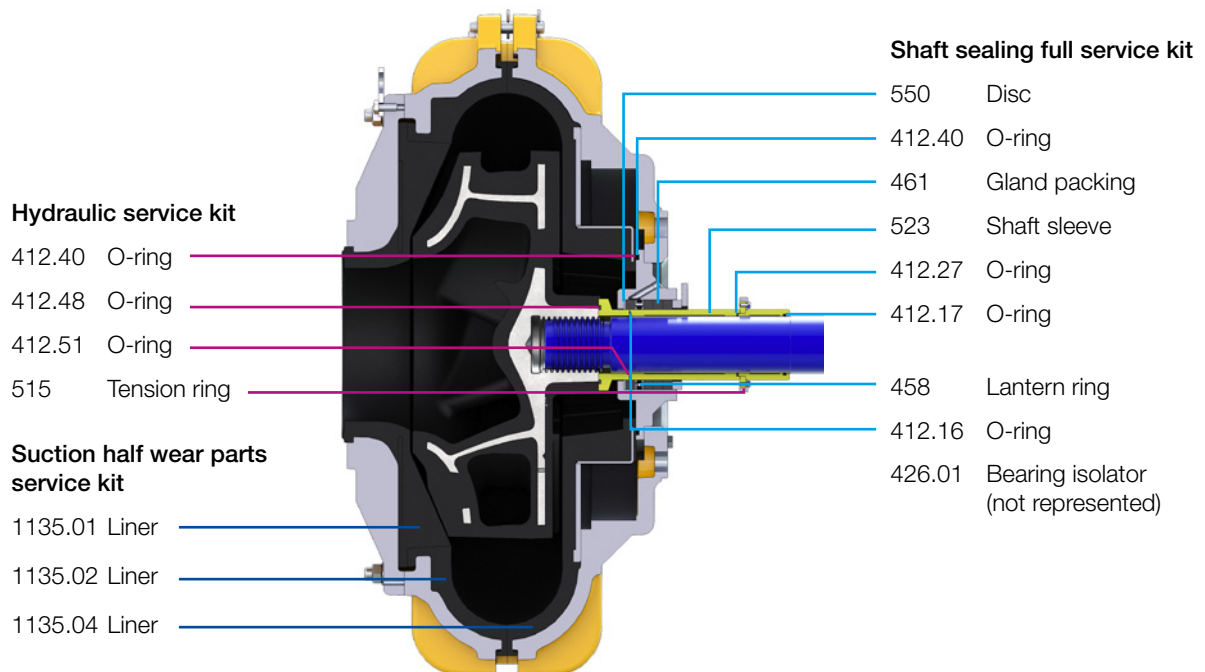

* Only for EMW-R

** Depending on the shaft seal fitting, either gland packing kit, expeller kit or mechanical seal kit is needed.

EMW-M (metal construction)

EMW-R (rubber lined construction)

The Sulzer Flow division keeps your processes flowing. Wherever fluids are treated, pumped, or mixed, we deliver highly innovative and reliable solutions for the most demanding applications.

The Flow division specializes in pumping solutions specifically engineered for the processes of our customers. We provide pumps, agitators, compressors, grinders, screens and filters developed through intensive research and development in fluid dynamics and advanced materials. We are a market leader in pumping solutions for water, oil and gas, power, chemicals and most industrial segments.
